

SKUNK

Materials Needed: two dice, paper and pencils for each player

Instructions:

On your piece of paper, make a chart with 5 columns and write the word "SKUNK" with one letter in each column.

S	K	U	N	K

One player will roll both dice, multiply the two dice together to get a product. Players write the product total in the "S" column of your chart. Decide if you want to continue to play or if you are done for the round.

The round is over if a 1 and another number are rolled. Everyone adds up their points for that round.

If two 1s (snake eyes) are rolled, the players still standing lose all their points while the players that chose to be out, total up their points for that round.
