

# Taboo

**Players:** 2-3 players

**Materials:** deck of cards (It's okay if you don't have a full deck.)

**Aces = 1, Jacks=10, Queens = 11, Kings = 12**

(You are welcome to make these cards any value you want.)

**Objective:** to practice division as inverse operation of multiplication

## **Instructions for 3 people:**

1. Put the pile of cards between two people.
2. The two people each pick up a card without looking at it and hold it up to their forehead so the other person can see their card.
3. The third person calls out the product (multiplied answer) of the two cards.
4. The players holding up the card have to guess the card they have based on the product given and the card the other person is holding.

## **Instructions for 2 people:**

1. Put the pile of cards between the two players.
2. Each player picks up a card. The student player cannot look at their card and holds it up to their forehead.
3. The adult player puts down their card for the student to see and calls out the product when multiplying the student card with their own card.
4. The student player must guess the card they are holding to their forehead based on the product given and the value of the adult player's card.
